

US Open with RG3's Newest Rider: David Vuillemin

David was the 4th fastest in practice behind Stewart, Carmichael and Windham. The RG3 team was hard at work getting David's front end dialed in for the track. We changed some fork settings and got it handling a million times better. David got 2nd in the Heat race behind Stewart and in front of Ferry. In the other heat, RC won in front of Tedesco, Byrne and Windham.

In the Superpole, the rider to post the fastest lap time made \$10,000... David did something a little different than most riders... He goon rode the whole lap! The crowd went nuts with laughter! In the main event, David started 2nd behind Tedesco. He passed him right away and led for 7 laps. RC and James passed David eventually but not without a fight! David ended up 3rd in the Main Event and 4th Overall for the weekend behind Stewart, RC and Windham beating out all other factory riders.

"I am happy about this race and the McGrath race. The team is really supportive and is trying to get the best equipment they can to fit my style. Races like that help me get back to work on Monday morning! There is still a long way to go and a lot for me to improve but I feel like I am on the right path!

RG3 Smart Valves™ and Linkages for '07

The RG3 Smart Valve™ is like nothing ever done before in suspension valving. Using two different sized fluid damping ports instead of one, RG3's Smart Valve is capable of flowing the proper amount of fork fluid for the speed at which your fork is traveling.

At low speed, the Smart Valve gives a controlled flow of fluid which handles the vagueness or mushiness often felt at this speed. On the other hand, at high speed, fluid flow is often choked which gives a spiky feel to your ride. The Smart Valve is able to provide enough fluid flow at high speed to handle the spiky feel.

The result is a fork that settles into ruts and absorbs the harsh feel at high speed. This gives you the rider a certain and predictable feel for the terrain. Currently in use with all our race teams, including AMA Privateer of the Year - Nick Wey.

Our Smart Valves™ and links are available for the following '07 models:

Smart Valves™:	Linkages:
KX 250F	RM-Z 250
RM 125	RM-Z 450
RM 250	
RM-Z 250	
RM-Z 450	

'07 KX 250F Triple Clamp

Available for the 2007 models, our KX 250F triple clamps are in stock and come in Machined, Black or Factory Brown. As a replacement for your stock clamp, this piece of machinery will give you the edge you need to shave time off your laps or just gain more handling and control overall. Call and get your own today.
